REASONS FOR ALLOWANCE

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 32-36 been renumbered 31-35.

2. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1 and 28, Duffy (5,055,151), discloses a erosion controlling mat with a low profile that enables it to permit water to flow over it in a laminar flow. The mat comprises a plurality of layers with a filamentary layer. Further regarding claims 1 and 28, Prunty et al (5,786,281) disclose an erosion control blanket comprising a core of randomly oriented fibers with a top and bottom netting.

However, both Duffy and Prunty et al fail to explicitly disclose or suggest provision of an erosion control mat comprising a single core of randomly oriented fibers, an externally disposed biaxial geogrid fastened to a substantially flat upper surface of the core and an externally disposed grid-like netting material fastened to a lower substantially flat surface of the core wherein the biaxial geogrid material is physically different in structure from the grid-like netting material and whereby the mat is structured to resist trapping of sediment and to allow flowing

particulate matter to pass freely over the mat during a hydraulic event in combination with the rest of the limitations claimed by the applicant in independent claims 1 and 28.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
